We're proud to introduce our new **SCREENAMAX Zip Screens**

- ✓ 4 1/8" cassette for shades up to 23' wide (max height of 15' with 1 5/8" zip tracks)
- ✓ 3 3/8" cassette for shades up to 20' wide (max height of 8' with 7/8" zip tracks)
- ✓ Zoomtech® anti-deflection technology
- ✓ Available in custom powder colors
- ✓ Variety of fabric options

Big shades in a discrete, ultra compact cassette are now a reality

- ✓ Non-visible fasteners
- ✓ Resistance to strong winds
- ✓ Protection from insects
- ✓ Suitable for interior and exterior use
- ✓ 100% wireless, solar motorization option
- ✓ Effectively controls indoor room temperature
- ✓ Seaside powder coating option (to prevent salt erosion)

Zoomtech[®] Technology

Our team of specialists have collaborated with Zoomtech[®] to bring you the most innovative solution for creating massive zip screens with zero deflection.

Ultra Compact Head Box

3 3/8" for shades up to 20' wide
4 1/8" for shades up to 23' wide

Optional Solar Powered Motorization
with embedded batteries

Low Profile Engineered Bottom Bar

Super slim bottom bar is designed to nestle
into the head box when retracted

No fabric weld line is visible

End caps engage within the zip track side channels
for a stronger connection and the width of the hem
bar is designed for minimal side ways deflection

Vast Fabric Collection

Ultra Durable Powder Coating

3 RAL colors are part of our
standard collection however
practically any RAL color is
available upon request
thanks to our in-house
powder coating line

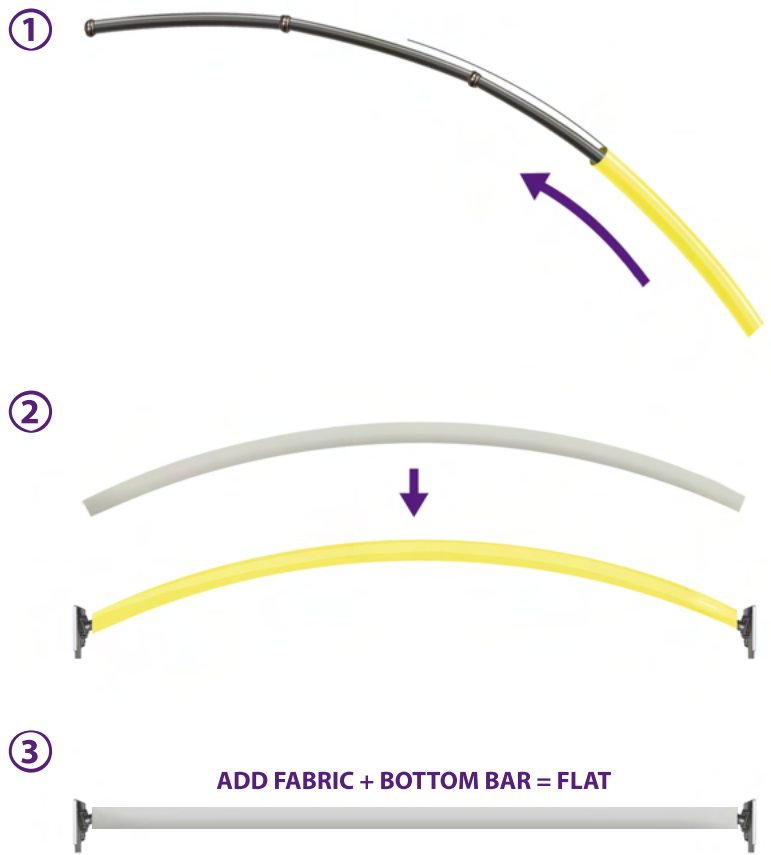

MANUFACTURING PROCESS

Our team uses a Zoombox Computerized Bender to curve a custom steel tube according to specific data in order to compensate for the span and total weight of a large shade.

This steel tube is then fitted with bearings and the curve apex is confirmed before it is next inserted into an exterior roller tube.

This process allows us to pair extra wide shades with very small diameter tubes.

Once the Zoomtech® roller shade is assembled with fabric and bottom bar, gravity forces the shade to hang perfectly flat with zero deflection.

WITHOUT ZOOMTECH®

The shade ripples and creases due to the pull of gravity

WITH ZOOMTECH®

The shade stays perfectly flat with zero deflection

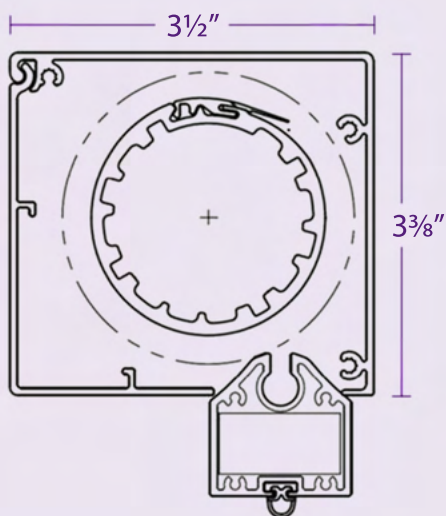

Size Options

Shades Up to 20' Wide

SYSTEM #85

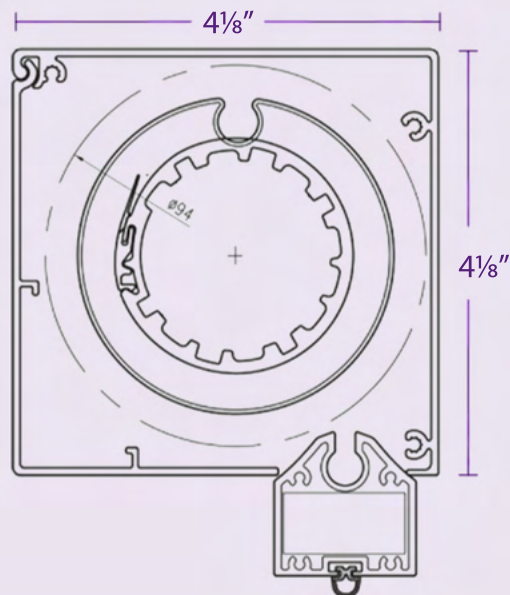

- 2 3/8" diameter tube
- 150 sq.ft max

Shades Up to 23' Wide

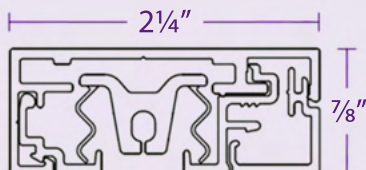

SYSTEM #105

- 3" or 2 3/8" diameter tube
- 200 sq.ft max

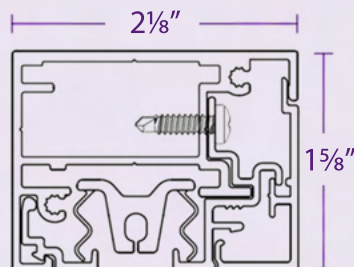

ZIP TRACK #22

- up to 23' wide when mounted between jambs.
- up to 10' wide when surface mounted.

ZIP TRACK #42

- up to 23' wide either surface mounted or mounted between jambs.

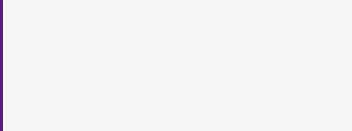

zip tracks #22 & #42 can be used in either system #85 or #105
